

3-Month Tactical Investment Portfolio (April–June 2025)

 For: [Sreelekha] |  Curated by: Durga Prasad

Objective:

To create a **diversified, high-conviction, tactical 3-month portfolio** that aims to **beat the market returns** by selecting stocks and ETFs across high-potential sectors with controlled risk and flexibility for rotation.

Why These Investments?

✓ **Sector Leaders:** We've chosen top performers from each sector like Reliance (Energy), SBIN (Banking), and Infosys (IT).

✓ **ETFs for Diversification:** ETFs are used to spread risk and gain exposure to broader themes (IT, FMCG, Energy, Realty, Gold, etc.).

✓ **Partial Share Replacement:** Where full shares were expensive, we picked mutual funds or ETFs with high exposure to the desired company.

✓ **Risk Management:** Defensive stocks (like ITC), Gold hedge, and diversified ETFs are included to reduce volatility.

✓ **Cash Buffer:** ₹803 is kept for quick rebalancing based on market opportunities.

Expected Return Outlook (3-Month)

- **Target Return:** 5–8%
 - **Upside Potential:** Comes from recovery in IT, continued strength in energy/banking, pharma growth, and a stable base from FMCG/Gold.
 - **Market Sentiment:** Consolidating now with signs of revival in mid & small caps, supportive of this strategy.
-

Risk Management

- ☒ Defensive FMCG & Gold for market downturn protection
 - ☒ ETFs ensure broad market coverage
 - ☒ Diversified across **11+ sectors**
 - ☒ Kept cash ready for rotation to act fast if market dips
 - ☒ No over-allocation to any single sector or stock
-

Summary Notes

- This portfolio is crafted to be **agile yet stable**.

- We've mixed growth + value + defensive stocks + global exposure.
- You won't need to monitor this daily, but **review weekly** for any sector changes or major economic shifts.
- ₹803 is left aside so we can re-enter any beaten-down sector or ride a breakout.
